ACTIVE ODOR
DESTROYER

4151290 DC 12/24V

CE FC RoHS

OZ20^{HD}
USER MANUAL

GETTING STARTED

Using the power of ozone, the **OZ20** HD is built to remove unwanted odors from your vehicle. Use in unoccupied vehicle only.

1. Insert the **OZ20** HD into the vehicle's 12V DC port.
2. Press the power button once to turn on. An orange light will appear and the unit will begin cycling 15 mins on & 15 mins off for 8 hours. After 8 hours the unit will turn off.
3. To turn off, press the power button once more or remove the unit.

WARRANTY

We guarantee our product within one year of purchase. Please register at **ScentLok.com/RegisterOZ**. The guarantee does not cover equipment which has been damaged due to abuse, misuse or accident, such as:

- use of incorrect line voltages;
- failure to follow the operating instructions that are provided by ScentLok Technologies;
- improper or unauthorized repair; or
- fire, flood, "acts of God," or other contingencies beyond the control of ScentLok Technologies.

Model:	OZ20 HD (4151290)
Input Vol:	DC 12/24V
Power:	3W
Output:	20mg/h

WARNING

This product should only be used according to the instructions in this owner's manual. If used other than what has been specified here, serious injury may occur.

Improper use of this unit can cause the lighter to generate heat, possibly causing damage to the vehicle or operator. The ozone unit is designed to be used in unoccupied spaces only. Upon entering a vehicle that was treated with ozone you should ventilate the area allowing any possible lingering ozone to be cleared out. Never aim ozone directly into your face; it may cause eye irritation or other side effects.

If entering a vehicle where the unit was in use and it is still filled with ozone (O_3 has not fully reverted back to O_2), it may cause mild headaches or irritation to the respiratory system. If this occurs, please exit immediately. If eyes continue to be irritated flush gently with water. If conditions continue seek medical attention.

Keep away from children. Do not dismantle the ozone unit.

Depending on the concentration of bacteria and volume of odor, more than one cycle may be required to eradicate odors. Always allow for proper dissipation time between cycles. Exercise caution when using ozone on items with significant elastic or rubber content. Discontinue use on rubber or elastic items if you notice degradation or weakness to the structure of the items. Do not expose safety equipment to active odor destroyers. To prevent electric shock, do not plug or unplug unit with wet hands. Do not disassemble or insert items into unit. Doing so may cause damage or electric shock.
